Signature Sound

The ancients accepted the idea that everyone had an individual sound: Each distinct frequency--called a Signature Sound was a combination of a person's location, age, astrology aspects, and who knows what else. As we move into the future, that sound may, one day, serve as our identification?

Just like musical notes and combinations of tones, these sounds, as perceived by others, can be pleasing, discordant, or anywhere in between. Your individual signature sounds can influence how people respond to you.

Modern scientists have established the fact that frequencies are coming toward and bombarding each of us from outer space. It is my contention

that when outer and inner sounds don't match -- dis-ease is the result.

We humans attempt to balance our own sounds by meditation, prayer, eating, fraternizing, and thinking appropriately. If none of that works our frequencies become discordant; pain and unbalance results.

At that point, we usually seek outside guidance, a doctor, herb, self-talk, or a change in our behavior. In the spirit of blending inner and outer frequency-based influences, we offer the following insights:

EVERY BODY HAS A SOUND

Frequencies of Future and Past

Imagine a world in which we can be individually identified, manipulated, or controlled through the use of frequency-based biomarkers that can easily be discerned through our vocal animations.

The brain communicates using the language of frequency and has the ability to reveal individual health related templates that have the potential to promote and extend life. This has taken centuries to develop, but many numeric frequency patterns of the brain have recently been decoded by pioneer researcher, Sharry Edwards, MEd, and her dedicated crew at the Institute of BioAcoustic Biology & Sound Health located in southeastern Ohio.

Our brain is a central processing unit of our body that initiates and circulates frequencies throughout the vast neural network; providing directives and power to keep our bodies in exacting homeostasis. Edwards believes that the voice is a holographic representation of brain. This indicates that even unspoken, thought can become our guiding force in keeping us healthy, emotionally balanced; or potentially controlled through electronic means.

Modern String Theory proposes that infinitesimally small strings create and maintain our bodily structures, but String Theory doesn't answer the question of how this transformation occurs.

Edwards trusts that the work being done by the Institute, using vocal frequency analysis, has shown that we can each have dominion over those frequencies by individual mind

management or a simple remote control that is completely programmable.

We are each unique; and modern medicine is showing us that a "one size fits all" protocol is a certain road to disaster for humanity.

Using vocal profiling, even remote evaluation, emotional as well as physiological issues can be revealed and addressed.

Finding one's own voice takes on new meaning if one begins to consider the possibility that the sounds of the voice may be a holographic representation of all that we are. Imagine a future in which an individual vocal frequency can be used as identification; where the use of frequency-based biomarkers contained within our voice can be used to keep a person healthy and emotionally balanced.

From birth to death, sound is used to express individual needs and emotions but there are additional layers of information hidden within the words. As humans evolved, language became levels of intricate harmony nestled within structures of great elegance that carried meaning and allowed understanding of ourselves and others

**As man evolved,
language became
levels of intricate
harmony nestled
within structures of
great elegance that
carried meaning and
allowed understanding.**

Everything that happens to the body reaches the brain as a biofrequency which is then sorted, routed, and assigned an interpretation. But, it seems in modern times, ~~that~~ we carry very little conscious awareness of this process. Did we as a human race forget, or were we forced to abandon a great deal of our intrinsic abilities to glean information about another person simply by hearing their voice?

Down through the generations, the idea that humans are fostered and driven by ancient numeric codes has intrigued many scientists and visionaries. The popularity of publications such as the da Vinci Code and The Symbol by Dan Brown has sparked interest in the possibility that a great deal of knowledge has been kept hidden from all but the elite of humankind. Is the idea that we have dominion over our lives through our thoughts and intentions an intrinsic fact of human spirit? Can we, in truth, chant the words and create our Reality?

The obvious success of the tide-turning movie, The Secret, showed that people are ready to accept the fact that we can think or say something and have it manifest. Have we sufficiently matured to receive the bounty of consciousness produced reality with wisdom? Do people really know what they want, deep down, devoid of old parental "tapes", advertising, peer pressure, the "oughts" and "shoulds" that we are subjected to daily?

If we want to manifest our neighbor's car or wife for ourselves is this a lack of respect or our basic right of conscious intention? If we accept the reality that we all fit, perfectly into the perfectly conceived, perfectly interlocking puzzle of life, then how can we allow any two people to want the exact same item? Someone would do without and therein resides the basic conundrum. If we both pray for the same thing, who gets the prize?

So how can someone "program" their lives with the voice of prayer and mantra without bumping into the needs and rights of others?

Many spiritual leaders, though-out the ages, have claimed that we have the power to be who we want to be, to have what we want. Could it be that the world is designed perfectly and if we really knew the ideal life to manifest, then everything would be in harmony. But how can we ever know what will perfectly balance our lives? How can we know what we really want underneath the layers of greed and need?

We can find our true voice! Nothing is hidden from your own voice if you have a way to listen. You may be able to lie to your friends and deceive yourself with your words but the sounds of the voice do not lie. Vocal Profiling computer software has been built that can evaluate the frequencies, architectures, and harmonics of your voice. Vast frequency-based databanks can now be used to create a report of what you really think, who you are emotionally and the status of your health. The frequencies missing from your voice are just as important as those that are present. An entire matrix of information, from your DNA to your partner preferences can be evaluated.

Using this modality, your voice can be used to reveal who you really are under the layer of public personality you have created. This is an opportunity of the human race to break free of all of the deceit and deception that we live with on a daily basis.

What would our world be like? Our legal system would be unneeded if the true voice could be so easily read: Unsound relationships would crumble, businesses would fall because for the most part, our world is built on what we can keep hidden from those who think they know us.

Vocal Profiling has the ability to let us know the intentions of our leaders, the motivations of our partners, the pathway to our sense of self. Would that be of value or an avenue toward destruction?

What would a world be like if everyone only spoke the TRUTH? Can you image a society where we are all known by our frequency signatures that people could read through a voice that truly represented who we are? Could finding our true voice allow us to create a world full of grace and dignity?

We created music in our own image. Let us all be perfect musical compositions with no sour notes.

It may be that many questions and answers could be revealed if each person could come into balance with themselves, their nature, and the universe.

How does the Universe influence your intrinsic biofield? As frequencies come to earth, they envelope and blend with each person's Signature Sound. To better know what to expect during the coming month, we offer the correlations to what is coming to us from our own universe.

REMEMBER THAT PEOPLE WHO ARE VERY INTUITIVE MAY BEGIN TO EXPERIENCE THESE INFLUENCES EARLIER THAN OTHERS.

Keynote – April, 2022

March 27-April, 2, 2022

Universal sounds are quickly moving into frequencies of gliadin and gluten; two heavy handed grain related allergens; made worse by serine unbalance. Antibodies are activated along with genes and proteins that deal with the management of grains in the body. Remember BROWSE – Barley – Rye – Oats – Wheat - Spelt – Eliminate. Digestive enzymes might be helpful.

The last week of April opens the celiac gene. For some people grains can cause Leaky gut; which can result in a myriad of immune issues.

Just the beginning of blood sugar issues will rise on Tuesday, but won't be severe. Those with glucose issues may need to closely monitor insulin and food intake.

Muscles in stress – tiny muscles that hold the vertebra together – the multifidi will be active for the next ten days or so. Abdominal muscles, the Rectus superior of the eye is also in stress for the next few days. You may feel your eyeball moving – you shouldn't – when you look upward.

Streptococcus pathogens are active now – a bit of a sore throat or ear irritation may be about. Gargling with some good salt water or TeaTree oil will usually take care of this strain.

B2 – riboflavin is in stress for the next six days – soy is high in B2, but I'm reluctant to suggest it because of all of the side effects soy can bring upon the hormonal system. Greens, yogurt, mushrooms, eggs, asparagus, turkey, and almonds are among the highest in B2. When you have lots of B2, the urine turns bright yellow – Even its name "flavin" in Latin means yellow. B2 is important to help metabolize iron and create energy for the body. It also plays an important part in replenishing your DNA.

If your energy is down, norepinephrine may be the cause. If you have our Methylation Mapping software, it may be a good time to check your dopamine and serotonin levels. This is the beginning signals for allergy season. SoundHealthPortal.com – Campaigns – Methylation.

April, 2022 - WEEK ONE - influences that may impact your physical and emotional wellbeing:

Your may notice a lag in muscle response as the Dystonia gene becomes active. Glycine may help with muscle signaling. This may be important for anyone with any kind of muscle stress: e.g., Parkinson's, ALS, multiple sclerosis...

The platelet activating factor and vasopressin both known to be associated with the circulatory system may be active for the next few weeks.

DNA and stem cells will continue to be stress for the remainder of April.

Nutrients and biochemicals in stress: hydroxyproline, DNA, nerve growth factor zinc, leucine, isoleucine, magnesium, GABA receptor (brain activity), keratin, asparagine, and ornithine.

Muscles in stress are mostly the rectus eye muscle associated with Macular Degeneration.

April, 2022 - WEEK TWO influences that may impact your physical and emotional wellbeing:

Detox nutrients and energy cycle nutrients are in stress this week. See Amy Yasko's work for more information on the body detox. MOLD especially seems to be very active beginning this week.

April, 2022 - WEEK THREE influences that may impact your physical and emotional wellbeing:

The body's ability to detox is important to keeping cancer cells from over running the system. BioAcoustic Biology has found three issues consistent with cancer: Vit A, Catalase, and Calcitonin, which are all active this week. Basic Mitochondrial and neurotransmitters associated with inflammation are stressed this week.

[To evaluate your voice for inflammation markers, go to SoundHealthPortal.com – CAMPAIGNS] – open to the public.

Muscles stressed this week: fingers, hand and tongue

Nutrients and biochemicals in stress this week: aspartic acid, mitochondrial, adenosine, thyroid enzymes, beta carotene, estrogen, homocysteine, and potassium.

HLA dq2, the Celiac Gene becomes active this week.

Medications: AZT, Ritalin, Adderall – watch for less or more reactions.

April, 2022 - WEEK FOUR influences that may impact your physical and emotional wellbeing:

Lower back stress comes into action this week. There are some wonderful exercises online for low back issues.

Nutrients: PABA, Glucosidase, calcium cell salts, and the use of sulfur.

Medications: Allopurinol (GOUT)

Muscles: sternocleidomastoid (neck, shoulder) iliacus (lower back), rectus muscles of the eye, tendon under arch of the foot. Scalenus (Neck)

Toxins: Cesium 137 (radiation) and ammonia
