

Mommy, Why Do I Feel So Dumb?

How a toxic load can damage your health

Sharry Edwards, MEd

Astrology correlation: Pisces

They said she had forgotten how to read! Over the summer, Andi, a top reader last session, had forgotten how to read. I couldn't believe it. "Has there been any trauma in her life this summer?" her teacher demanded.

I was stunned. It had been a beautiful summer with the children. I had finally been able to afford a real home for them. Actually, this was the first summer I had been able to spend time with my children since I had enrolled in college, as a single parent, to try to get my life back together.

What could have caused this? The summer had been wonderful and fulfilling. How could my child forget how to read?

I met with her teacher, and it was decided that Andi should be put in a special reading class. Andi was embarrassed and reluctant to go to school. She cried every day. On the days she didn't cry she pretended to be sick. My heart ached for her. The special classes were not helping. I didn't know what to do.

*Accelerating human healing through Vocal
Mapping: our future depends on its acceptance.*

One day while we were riding in the car, Andi wrote something on a small slip of paper and handed it to me. Her head was down. She was staring at her lap. It read, "Mommy, I feel so stupid. Why can't I read anymore?" My tears were so quick and so thick that I pulled over onto the side of the road. We cried together, embracing, sharing the frustration and dismay. Was I such a failure as a parent that I could not find help for my child? I vowed to find an answer for Andi and for myself.

I was aware of a pioneering technique that used low-frequency sound to help another little girl in our area reverse mental retardation. They used voice testing to detect and remedy the issues. Could something like this help Andi learn to read again? I scheduled an appointment. During that session, using low-frequency sound, Andi was able to read clearly and without hesitation. Her relief and my joy were indescribable.

The test pointed to the possibility that Andi had been poisoned with formaldehyde, a chemical preservative. When I was asked if my child had been exposed to formaldehyde, I started to say "NO" but then I remembered. The mobile home instructions had warned that formaldehyde levels in our new mobile home might be a problem. It was the fault of the mobile home company. They should have given me stronger warnings. It was my fault! I had allowed my child to be poisoned.

We quickly entered into a program of low-frequency sound in combination with clearing the air in the mobile home with an ozone air filter. Andi's teacher noticed immediate and striking differences. Andi's self-esteem soared. I had a bright, cheerful, intelligent seven-year-old again.

We had the other two children tested. Both had been affected but not to such an extreme. As they all entered the program, behavior problems decreased and there were considerably less arguments in our home.

I've learned from reading that some of the symptoms of formaldehyde sensitivity is irritability and problems with memory and I've also begun a campaign to alert other parents to the dangers. What would have been the consequences for my child? Her life would have been charged with unfair opinions and gossip that she did not deserve. I am very thankful that there is a program like Sound Health Alternatives that can test a vocal print and offer an answer. It was painless and inexpensive. When I think of what could have happened, I know that I need to let others know about this wonderful program.

Sound Health has an ongoing research project using vocal analysis and sound to try to find the causes of reading and learning problems with other children. It is a non-intrusive program using a vocal print. Every child with a learning problem, no matter what the cause, should have access to this technique.

I would encourage any parent of a child with unexplained symptoms to have their child tested. I am very lucky. My child was helped. She will not grow up branded as "dumb" even by her own opinions because we, the adults, have failed to make our world a safe place to nurture, emotionally and physically, our most valuable resource, our children.

The above profile was written by Andi's mother, in the hopes of preventing any other family from experiencing the devastation of mankind's poisoning of our environment and

children. Andi is only one of many children who have been helping using the protocols of vocal analysis.

Dorinne Davis, a trained Tomatis and BioAcoustic professional has written several books about how she was able to help children using sound therapy. Her basic book about this topic is **Sound Bodies through Sound Therapy** by [Dorinne S. Davis](#) (Author), [Doris J. Rapp](#) (Foreword).

Toxicity from the thousands of man-made chemicals likely takes a tremendous health toll on the sensitive people of our planet. Formaldehyde especially is taxing because it is the same frequency as some especially important immune biochemicals meaning formaldehyde mathematically may inhibit our ability to mount a defense against incoming toxins.

Wikipedia reports that Formaldehyde is a pungent, colorless gas that [polymerizes](#) spontaneously into [paraformaldehyde](#). As a precursor to many other materials and chemical compounds, in 2006 the global production of formaldehyde was estimated at 12 million tons per year.^[14] It is mainly used in the production of industrial [resins](#), e.g., for [particle boards](#) and [coatings](#). Small amounts also occur naturally. Formaldehyde is classified as a [carcinogen](#) and can cause respiratory and skin [irritation](#) upon exposure.

Not only are we bombarded by environmental toxins but toxins that we voluntarily ingest can cause havoc on our biological and structural systems.

"I'm a waitress in the restaurant in the same building as Sound Health. Over the last few years my feet and hands have hurt so bad that some days I could just go home and cry.

Recently I spilled a full glass of water on a customer simply because I could not feel my fingers enough to grip the glass. I was really upset. Sound Health heard about my plight and offered me a little tone box that played a low rumbly sound through headphones. It was explained to me that people with diabetes (I've been diabetic since I was four years old) often experience peripheral neuropathy, restless leg syndrome and limb weakness.

I did not expect much but to my surprise the sounds took away the pain, helped me regain my strength and allowed me to continue explained to me that taking insulin can often damage nerves. This tone box has been a Godsend to allow me to continue my life without pain."

"My friend Lisa witnessed my results. She has some similar symptoms and decided to use the public version of the Restless Leg tone box developed to help people eliminate the stress of sleepless nights due to pain and the shocking feelings from nerve damage. She wants to share it with her mother. The word is spreading. I can see how this will be the medicine of the future."

BioAcoustic tones are generally individually created for each person. For a few things sounds are common, like sounds for broken bones or muscles. Especially biochemical systems need individuated. The sounds presented are much more than just a frequency. Specific formulations to support specific outcomes using any frequencies presented are incredibly crucial.

Are we at our core very sophisticated math-based robots that can be “managed” through our individual responses to frequency-based biochemical signatures?

BIOACOUSTIC SOLUTIONS

Breaking the Sound Barriers of Disease!

Can Your Voice Reveal the State of Your Health?

Evaluating your own voice takes on new meaning if you begin to consider the possibility that the sounds of your voice may be a holographic representation of all that you are. Imagine a future in which our individual vocal frequency is our identification; where the use of frequency based biomarkers contained within our voice can be used to keep us healthy and emotionally balanced.

From birth to death, we use sounds to express our needs and emotions but there are additional layers of information hidden within our words. As man evolved, language became levels of intricate harmony nestled within structures of great elegance that carried meaning and allowed understanding of ourselves and others.

Every Body has a Sound

BioAcoustic Biology has verified that the frequencies of your voice are a numeric holographic representation of those brain waves. Correlations of these frequencies to human health and wellness have been decoded by the Institute of BioAcoustic Biology & Sound Health since in early 80's

Exploring the Potential of Math as Medicine

In order to provide predictability and safety, the concepts of math and medicine often act conjointly to quantify, define and model medical practice. Studies conducted by the non-profit Institute of BioAcoustic Biology & Sound Health, located in Albany, Ohio, USA, have consistently demonstrated that math can be much more than a measurement tool. The case studies they have amassed, using Math, as frequency-based BioMarkers, indicate that the solution to therapeutic predictability and resolution may be possible.

Designed for Professionals

Class Structure:

ONLINE

Cost: \$6400

\$4400 until

12 \$4,400 until

Se June 2024 up,

self-paced, 2-hour classes.

Session 4-5; private, 2 hours each

Course Outline:

Session 1- Preparing your computer, Portal overview

Session 2- BioMarkers, Client Reports

Session 3- Templates, Bundles

Session 4- Reports, Formulas, ToneBox

Session 5- Client Follow-up

FREQUENCY HEALTH KEYNOTES

based on BioAcoustic interpretation of the frequencies coming toward our planet for MARCH

Below is an outline concerning Interstellar frequencies bombarding the earth that may be influencing your wellness during March 2024. Very sensitive individuals may experience these influences a few days in advance of the dates shown.

Feb 25-Mar 2 through the first two weeks of March – the heart Muscle frequencies are stressed; frequencies for the last two weeks of March involved thyroid function and the knees.

For all of March, the forearm and wrist muscles may be vulnerable. Bad time to take up golfing.

Mar 3-9 - Specific Nutrients/Biochemicals in stress during this time: B3, myosin, biotin, adiponectin (weight related), catalase (blood detox related). B3 helps thin out the blood. Myosin helps stop Tinnitus damage.

Systems in stress this week: liver, blood pressure

Muscles in stress: little finger, pterygoid, lessor toes, supinator (forearm), palate, elbow, eyelids

Mar 10-16 - Muscles: heart, forearm, major hip muscles, trapezius (upper back)
Nutrients/Biochemicals: phosphorus, magnesium, myoglobin (oxygen to heart)
Systems: thyroid, blood pressure, blood clotting, joint flexibility
Medications: Prozac, watch for side effects

Mar 17-23 - Muscles: pterygoid, trapezius, minor hip muscles, wrist

Nutrients/biochemistry: thymine, hypericin, hemoglobin, taurine, glucose

Systems: Liver, thyroid, immune System, iron delivery

Medications: Dilantin

Pathogens: Epstein Barr Virus (fatigue)

Muscles in stress: wrist, joints

Nutrients/biochemistry: ATP (energy currency of the body, choline, iodine, collagen

Medication: Oxytocin

Systems: immune – influenza in particular, joint and movement flexibility, Collagen.

Mar 24-30 - Muscles: wrist, eye Muscles
Nutrients/biochemistry: brain plaque - serum amyloid, B12 bromelain, glucose, hydrogen.
Systems: mitochondria- originating genetic material

Mar 31-Apr 6 - week one influences that may impact your physical and emotional well-being: You may notice a lag in muscle response as the Dystonia gene becomes active. Glycine may

help with muscle signaling. This may be important for anyone with any kind of muscle stress: Parkinson's, ALS, multiple sclerosis...

The platelet-activating factor and vasopressin, both known to be associated with the circulatory system, may be active for the next few weeks.

DNA and stem cells will continue to be stressed for the remainder of April.

Nutrients and biochemicals in stress: hydroxyproline, DNA, nerve growth factor zinc, leucine, isoleucine, magnesium, GABA receptor (brain activity), keratin, asparagine, and ornithine.

Muscles in stress are mostly the rectus eye muscle associated with Macular Degeneration. Congratulations to the winners of our Perfect Mate Software drawing from last month's column. [Sherry H, Krista C, Dyana R] Thanks to all of the persons who showed interest in our BioAcoustic software.

There are instructional videos on Vimeo.com under [Sharry Edwards](#).

Additional free software, Nutrition and Muscles are available at [SoundHealthPortal.com](#) when you attend our Guest/Apprentice course.
