

How important is the Truth?

Your Voice will tell on you

You can lie with your words, but the frequencies of your voice will always tell on you. Vocal Analysis software breaks down the sounds of your voice to reveal hidden personality traits and physical attributes.

We usually know, or at least suspect, when someone is attempting to manipulate us with a lie. We get into trouble when we don't trust our own perceptions or when we allow someone to talk us out of what we believe to be true.

To feel secure, we rely on the Truth to help us make decisions that best suit our life goals. Lies cause us to feel betrayed, confused, and manipulated. People who care about what is best for you do not lie to you. People lie to you to manipulate you, so that you will do what best serves their motivations.

Our world is in chaos because we have been so thoroughly lied to about our health over the last few years. Our political system is on the verge of collapse because of the tremendously conflicting lies we have been told by leaders who supposedly have our best interests at heart. Those who genuinely care, tell you the Truth.

From interactions within our family circle, to world politics, Truth must always stand at the forefront of beneficial decisions. We continue to think our leaders have our best interests at heart. It is actually up to us, individually, to decide what we accept as supportive and once we identify the truth from the lies, we can move toward positive action.

A listing of a few things a vocal print can reveal

1. Below are two vocal prints of Joe Biden – one from 2022 and one from 2024. Both indicate that Biden has within his vocal print the frequencies associated with an anti-dementia agent. This information could indicate that Biden has been on anti-dementia medications while attempting to be the president of the UNITED STATES. Someone knew this! Who was hiding it from the public, for what purpose and for how long?

Name: Joe Biden

				Rank
Crestor	Medication	H	can cause muscle cramps	1
Crestor	Medication	H	can cause muscle cramps	1
Magnesium citrate	Mineral	HH	used as saline laxative to empty bowels prior to surgery	1
Miacalcin	Medication	HH	Salmon derived nasal calcitonin	1
Velnacrine	Medication	HH	may = nausea	1
Alazocine	Medication	H	opioid receptor agonist and NMDA receptor antagonist	2
Centrophenoquine	Medication	H	activator of Centrophenoquine	2
Centrophenoquine	Medication	H	do not use if suffering from convulsions	2
Centrophenoquine	Medication	H	for cognitive enhancement - Should NOT use	2
Centrophenoquine	Medication	H	Increases body's endogenous synthesis	2
Centrophenoquine	Medication	H	may alleviate alzheimer's disease	2
Centrophenoquine	Medication	H	May alleviate anxiety	2
Centrophenoquine	Medication	H	May cause temporary Vertigo	2
Centrophenoquine	Medication	H	may enhance ability of microglia to remove lipofuscin	2
Centrophenoquine	Medication	H	may improve memory w/ dementia	2
Centrophenoquine	Medication	H	May Increase Blood Pressure	2
Centrophenoquine	Medication	H	May increase bodies production of energy	2
Centrophenoquine	Medication	H	May inhibit some aspects of aging	2
Centrophenoquine	Medication	H	May possess life extension capabilities	2
Centrophenoquine	Medication	H	May retard accumulation of lipofuscin in brain	2
Centrophenoquine	Medication	H	Possesses antioxidant properties	2
Choline Alfoscerate	Medication	H	lipotropic	2
Choline Alfoscerate	Medication	H	needed for liver & hormone production	2
Dalmane	Medication	LL	Minor tranquilizers (Sedatives) & hypnotics	2
Dextrophan	Medication	H	Depressant; cough suppressant & hallucinogen	2
DMAE & Centrophenoquine (CPH)	Medication	H	brain metabolic stimulant & neuroenergizer	2
Eferox - T4 levothyroxine	Medication	LL	Synthetic thyroid hormone	2
Eltroxin	Medication	LL	Synthetic thyroid hormone	2
Euthyrox	Medication	LL	Synthetic thyroid hormone	2
Ghrelin/Obestatin prepropeptide V3	Genome	H	thought to be involved in prostate cancer, pancreatic insulin secretion, gastroc acid secretion, satiation, glucose metabolism	2
Levoxine	Medication	LL	Synthetic thyroid hormone	2
Levoxyl	Medication	LL	Synthetic thyroid hormone	2

From Wikipedia: **Meclofenoxate (Lucidril, also known as centrophenoxine)** is a [cholinergic](#) [nootropic](#) used as a [dietary supplement](#).

In elderly patients, meclofenoxate has been shown to improve performance on certain [memory](#) tests. Meclofenoxate also increases cellular membrane phospholipids.

Meclofenoxate is considered to be safe and high in [tolerability](#). However, possible side effects may include, [insomnia](#), [dizziness](#), [restlessness](#), [muscle tremor](#), [depression](#), [nausea](#), [muscle tension](#), and [headache](#).

Aka: known via [Psychoanaleptics: as an Anti-dementia agent](#)

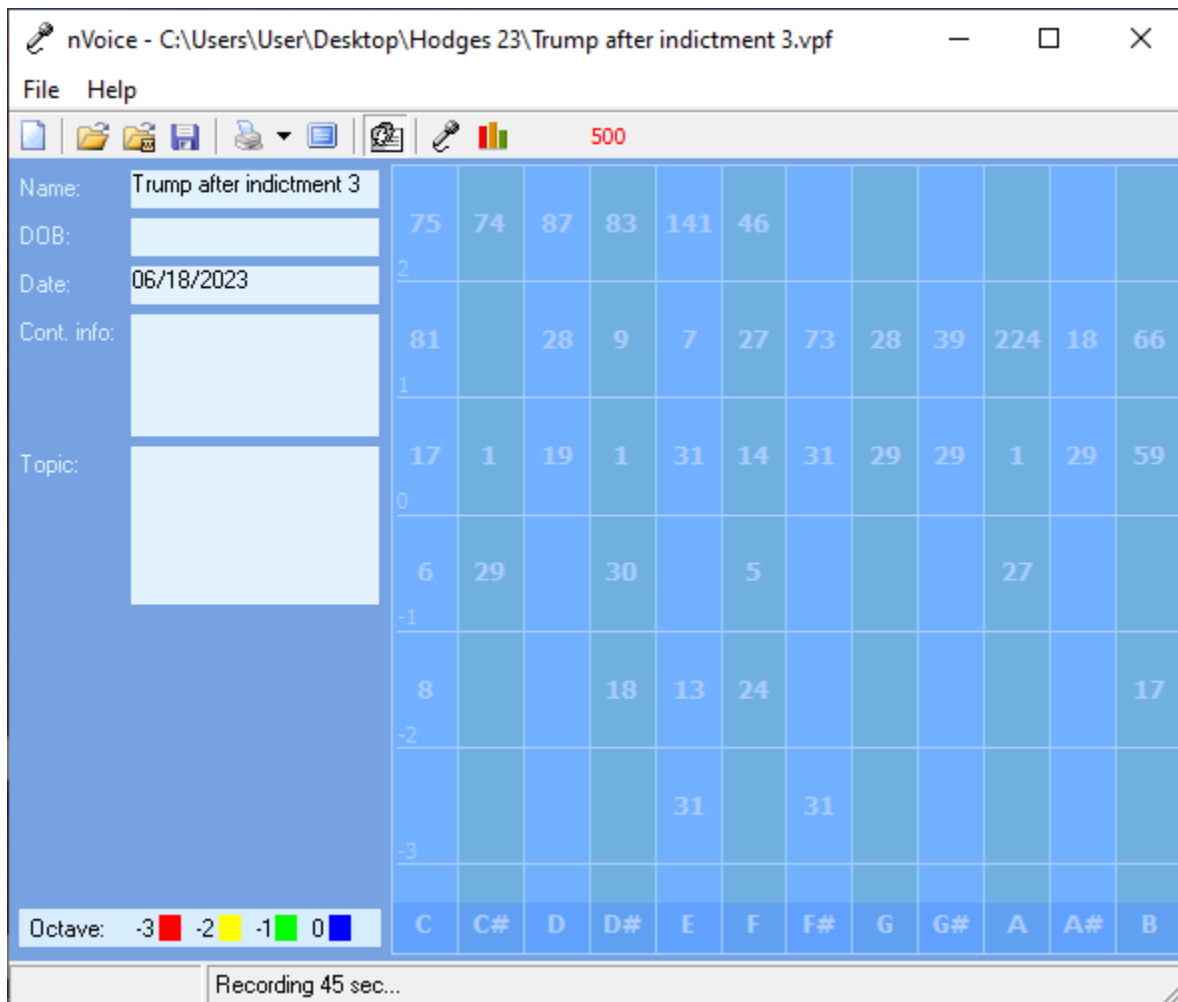

3. Kamala Harris has stated that she supports Fracking and that she will ban it – Her voice indicates both positions are True but contradictory. In her case she is repeating statements that are not part of her own identification but simply spewing info that she is repeating at the behest of someone which isn't really a part of her own perspective.
4. It was announced last year that Bobby Kennedy has similar ideas about protecting people, America and our future as does Trump. We predicted that the best ticket could be for the two of them to team up and that has now happened. So knowing about the personalities and perceptions of people can help predict their behaviors. I predict that Kennedy could help return civility to our society.
5. The vocal prints of China's President Xi, Joe Biden and Liz Cheney are almost identical meaning all three have compatible motives for their actions toward the populace.
6. What is the main motive of Liz Chaney for her part in the Jan 6th fiasco? Revenge against Trump and not much else.
7. Would you like to know the motives of the ABC Presidential debate hosts? David Muir wants to satisfy his personal perspective for justice – which shows to be naive while Linsey Davies spends lots of time thinking about physical outcomes and

promises to come. In dealing with this topic, they both exhibit a large dose of naivete.

8. Hunter Biden's change in motives went from "I was promised that I would be protected" to "I need to be my father's protector."
9. Kamala's consistent perspective in the majority of her appearances has always been – "What can I get out of this?"
10. First Husband Harris had absolutely no emotional connection to his statement, "I love her laugh." It was said to create a justification to get the public to embrace her cackling as something pleasant.
11. Using voice analysis, Robin Williams' Alzheimer's stress was identified three years before actual symptoms manifested. Predictive medicine is possible.
12. Shortly after the Benghazi bodies were returned to the US, Hillary's and Barack's statements about the cause of those deaths being a video, were proven to be false. The NanoVoice software concluded that their statement was false two years before their video announcement came out publicly as a distortion. Misinformation is no more than a camouflaged lie.

Their vocal prints showing their duplicity is published in our Workbook, The Biggest Liars. --- <https://tinyurl.com/bdfkdmdb> = Biggest Liars

13. Trump vocal print reveals his current motivations – a sense that he is carrying out God's mission, feeling that he can do the best job for the people and his total commitment to Justice. Trump is also withholding a great deal of information that will be released when it will be the most advantageous to him. This may be the actual reason why the assassination attempts continue. The information will come out regardless.

Knowing the motives and perspectives of people can help you be better prepared to make the optimal decisions to live your best life.

Tucker Carlson says that the truth “hums” inside of us like a tuning fork. The only reason we don’t act on it is because we have been talked out of it by professional liars. We doubt our own gut instincts! He suggests that we all need to “hone our Spidey senses.” He cautions us to remember that misinformation should immediately be labeled as a deliberate lie. <https://tuckercarlson.com/larry-elder-tour> - time: 16:16

So you suspect you have been lied to and want to take action! The following Steps for the People to Take Action may add to your ability to defend your intrinsic human rights and opinions.

1. Don't allow yourself to be separated or divided from your opinions
2. Abandon FAKE media and platforms – DE-SUPPORT those who distort
3. Evaluate evidence using TRUTH and JUSTICE as your values
4. Make sure your vote counts - Insist on election fairness and reform
5. Support those who cannot be BOUGHT but could be silenced
6. Honor TRUTH and the RULE OF LAW – full equality for every citizen
7. Work to improve and enhance our school systems
8. Evaluate local leaders - believe their actions not their words
9. Know your RIGHTS – read the CONSTITUTION and Bill of Rights
10. Challenge rules that are not just and equal for everyone
11. Insist of Health autonomy
12. Remember that Truth and Freedom were the goals of our Founder's

Keynote Oct 2024

Every moment frequencies are hurling toward the earth that influence our emotions and physiology. These monthly Keynotes are meant to forewarn you of things to come.

Generally for the month of October: the lower back, hip muscles, eye proteins and blood pressure issues are all active throughout the month.

Week One: Proteins that keep the eye lens clean are active this week. So is Troponin, an enzyme used to monitor heart trauma.

Hip muscles and lower abdominal muscles, which help support the back, are active and may cause back strain and pain.

Eye issues concerning opsin and the cornea are both in stress this week. Lipid (fat) overload and likely fatty liver issues may become obvious as digestive or hormonal upsets may cause discomfort.

Finger and joint connections may become cranky. Turmeric may help some of the inflammatory responses you are having. Blood sugar may be harder to control this week.

Week Two:

The hip muscles continue to cause discomfort. B1 may help.

Blood flow may be an issue this week. The stress chemical, cortisol, may cause mood swings. Iron stress by mid-week may cause more fatigue than usual.

Lipase (helps digest carbs) will be in stress for the next 10 days or so. Blood sugar continues to be an issue. This week calls for quality sleep so your body can detox more efficiently.

Week Three:

Muscle stress from lack of progesterone may cause more muscle and joint exhaustion. Eye stress continues. Sometimes it can be ameliorated by using colored glasses. Amazon has colored sets of lens or if you have a local store that handles such items, go try on different colors. The appropriate color will allow you to walk a straighter line down an aisle.

Low Glycine - supports muscles among other duties, may cause your legs to feel sluggish. You can test your muscles and nutrients using the [SoundHealthPortal.com](https://www.soundhealthportal.com). It provides muscle and nutrient software even at the Guest-level subscriptions.

Week Four:

Lower back stress comes strongly into play this week. There are several lower back stretches on the internet that you can try before getting out of bed. Selenium (Brazil nuts – supports vascular issues) comes into play this week along with Bile salts that help digest fats.

Eye strain continues. Candida and chlamydia frequencies are coming into play at the end of the week.

Wikipedia: Chlamydia pneumoniae is a bacterial pathogen that causes respiratory tract infections in humans. It is transmitted through respiratory droplets and can lead to

symptoms such as cough, fever, and chest pain. It is a common cause of community-acquired pneumonia and can also be associated with bronchitis and sinusitis. Early diagnosis and treatment with antibiotics are important to prevent complications and further spread of the infection.

Week Five:

Back stress continues along the spine. Choline and hemoglobin frequencies may cause mental confusion and fatigue.

For those with dairy issues, this may be a trying week, including for those who suffer mucous-causing sensitivities. Watch out for sinus and swallowing issues.

Insulin metabolism and cardiac muscles are stressed this week and into the beginning of next month.
